An aspiring Computer Science undergraduate looking to learn and venture to the corners of Computer Science

Academic Background

Son Tay high school, class for English Gifted Students
Post Telecommunication Institute of Technology

2013-2016
2016-now

- Cumulative GPA: 3.66/4.0

Awards and Achievements

Runner-up at JunctionXHanoi Hackathon

2018

Completion of Samsung's 2018 algorithm summer class

2018

Post Telecommunication Institute of Technology's scholarship for excellent students(3 terms)

2016-2017

Work Experience and projects

- **Internship at Umbala Network – A blockchain based company.**
Here, I implemented and optimized core functionalities of the company's blockchain platform such as transaction score calculation using NCDAwareRank (Variation of PageRank) and XiaoWei SCAN algorithm. Learned various development tools such as Git, profilers,...
- **Where's your brain (Game)**
- **Touhou (Game)**
- **Paper Soccer (Yet another game. But this one is multiplayer capable)**
- **Bouncy Balls (An event-based simulation of particles collision)**
- **Cost-Splitter (A simple web app that helps splitting the bill effortless and effective)**

You're welcomed to view samples of my code at Github: <https://github.com/thangdinh1298>

Skills

- Good grasp of basic (and some more advanced) data structures and algorithms
- Java, basic C/C++ and Python
- Relatively fluent in English

Certificates

- Completion of Princeton's Algorithm course on Coursera
- Samsung's certificate of completion of 2018's algorithm summer class
